

How do you
measure a year in
the life of the
IHA Collaborative?

- ✓ 60 minutes in an hour
 - ✓ 1440 minutes in a day
 - ✓ 365 days in a year
 - ✓ 525,600 minutes in a year
- 

Collectively, organizations in the IHA Collaborative....

- ✓ Admit a patient every 64 seconds
- ✓ Deliver a child every 10 minutes
and 21 seconds
- ✓ Begin a surgery every 90 seconds

As a group, hospitals in the IHA Collaborative...

- ✓ Register 2.8 patients per minute for the ED
- ✓ Register 12.4 patients per minute for other types of outpatient visits

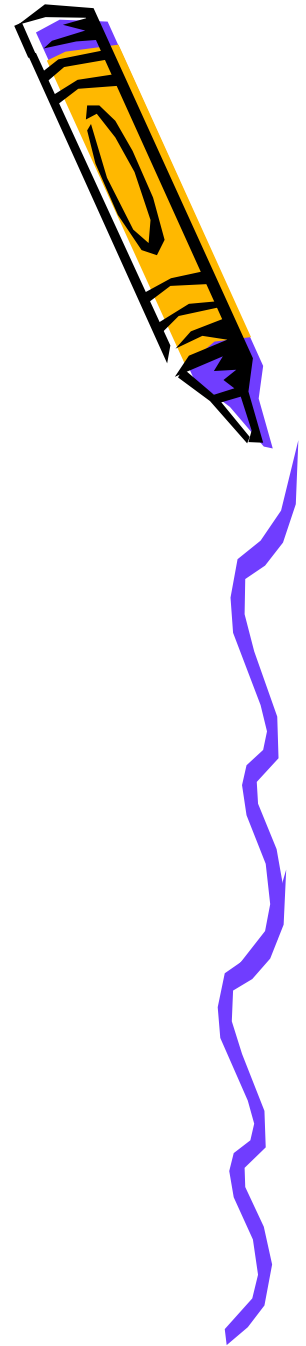

Within the IHA Collaborative,

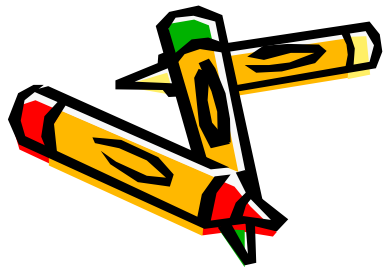

- ✓ A patient is discharged every 60 seconds
- ✓ Every 6 minutes and 15 seconds, that discharge is a child
- ✓ Every 14 minutes and 39 seconds, that discharge is for a psych or substance abuse problem

Imagine the number
of handoffs that
have occurred, and
ask yourself
Are we lucky?

or
Are we safe?
